PRIMER FOUNDATION

The **Foundation Primary** is an integrated course designed for the holistic development of children aged 3 years, known as the “Pancha kosha vikas”. It is based on the National Curriculum Framework for the Foundational Stage (NCF-FS) 2022. The course focuses on numeracy, literacy, and skill building while giving priority to play in the child’s learning process. The series facilitates learning across the five domains identified in the NCF-FS: physical development, socio-emotional and ethical development, cognitive development, language and literacy development, and aesthetic and cultural development. This five-level series equips teachers with the necessary tools to effectively teach groups of dynamic foundational stage learners. Through engaging content and abundant support, teaching and learning become both effective and enjoyable. The course emphasizes learning by doing, coupled with frequent repetition for better skill development.

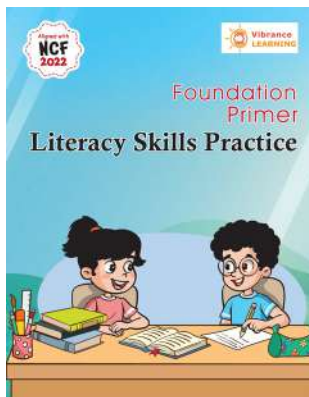

It targets skill development across all learning domains for children, and encourages creative and psychomotor development — a critical requirement for early years — through activities integrated across all levels. It reinforces basic values and skills through stories, activities, and pictures.

CREATIVE KIDS

Creative Kids is a set of 8 books designed for children at the pre-primary and primary levels. These books aim to help children learn various art and craft techniques. The drawing techniques in the books start from basic lines and simple shapes and progress to more complex figures. The focus of the books is on developing art and crafts skills, and children can use these skills to create their own unique work. It is hoped that these books will inspire children to realize their creative potential. The series is graded systematically to help children progress naturally from one level to the next. The books include a wide variety of activities such as line drawing, pencil shading, connect-the-dots, spray painting, scenery drawing and coloring, vegetable printing, and more.

BRAIN BOOSTER

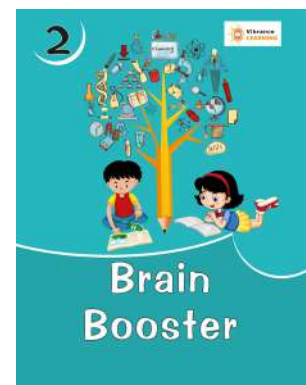

Brain Boosters is a series of General Knowledge books designed for students in grades 1 to 5. The books cover a wide range of topics and are aimed at sparking the curiosity of learners, focusing on skills for 21st-century students. The series includes thematic tasks and activities to help students acquire knowledge, develop various interests, and pursue different disciplines.

Key features of the series include:

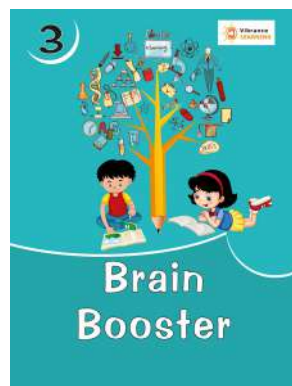

- Content from a wide variety of curricular and extracurricular domains
- Special emphasis on 21st-century skills, including life, learning, and literacy skills
- Grade-appropriate and easy-to-do activities that encourage further exploration
- Special focus on India-centric content with an emphasis on simplifying facts
- Emphasis on holistic learning with seamless integration of content with skills and social awareness — Updated content with an attractive layout and new images
- Interesting nuggets of information
- Comprehensive coverage of topics — Inclusion of unconventional and experimental topics

HEART AND SOUL

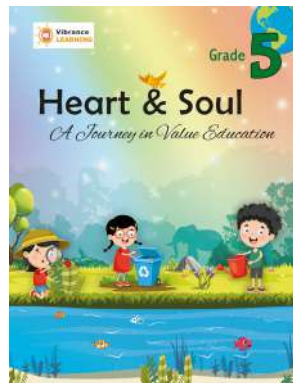

Values are our personal principles, shaped by our individual personalities and experiences. Parents, teachers, and peers influence these values, which in turn determine how people react to similar events. “**Heart and Soul**,” a series of 5 books for primary classes, aims to instill values that will help children sift through and process information, and make wise choices in various situations. The series also focuses on developing different aspects of a child’s personality, such as physical traits, intellectual qualities, attitudes, behavior patterns, and others. The goal of the series is to empower learners to lead balanced, happy, and successful lives. It encourages learners to respect diversity, demonstrate leadership, exhibit positive attitudes towards the community and the nation, and to be responsible while striving for conflict management in stressful situations. The series follows the guidelines outlined in the National Education Policy, 2020.
